

# ICELANDIC - FLUTED

creative  
materials  
corporation

## Installation Instructions

To install these fluted décor tiles, it is recommended to install them butt-tight without the use of spacers or grout joints. Please keep in mind that the tiles may have slight dimensional variances. For this reason, it is essential to conduct a “pre-installation” dry lay to make any necessary adjustments before the actual installation process. Whether or not to use the “End” to complete the installation is up to personal preference - it is not required for a successful installation.

## Mortar

Use a premium high-performing latex modified thinset with non-sag characteristics for best results.

## Disclaimers

1. Due to the shape of this product, exposure to water/moisture should be limited.
2. Due to the shape of this product, drilling holes should be limited to the flat portion of the tile. Not the curled edges.
