

COLOR SCHEME MOSAICS - PATTERNS

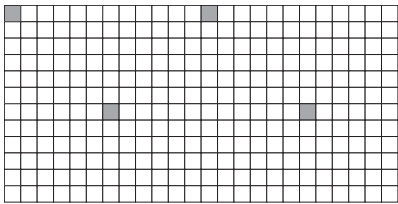

Let your imagination take shape! Our vibrant mosaics invite you to create captivating patterns that elevate any design scheme. Seamlessly combine borders, corners, and plaids to transform ordinary spaces into intricate, one-of-a-kind works of art. With endless custom possibilities and hundreds of thoughtfully selected patterns and borders, inspiration is always within reach.

IMPORTANT INFORMATION

MOUNTING:

- Pre-mounted sheets of tile speed up and simplify installation. They are self-spacing and bridge surface irregularities.
- Factory pre-mounted sheets are assembled together in two different ways:
 - Dot-Mount (standard)
 - Tiles are dot-mounted into 12"x24" sheets, using a heat cured poly-vinyl chloride adhesive, which is both acid and alkaline resistant. Hex tile is bonded into 12"x18" tile sheets. Some patterns may vary.
 - Clear Face (special order)
 - Tiles are mounted on a removable clear film-mount sheet bonded to the tile face.

LEAD TIME:

- 24 hours for pricing, 1 week for color renderings (upon request) and 4-6 weeks for production time. Times may vary depending on the size and complexity of the design. Typically, the manufacturing lead time for custom designs is longer than that of standard designs.

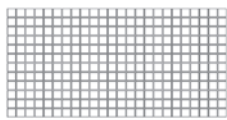

REMINDERS:

- If a hexagon border is required, you must provide a plan of the area with dimensions, because the Hexagon configuration precludes interchanging sheets.
- Use hexagon borders with hexagon field tile. Also, use a "floor plan" to avoid misinterpretations. Because of the unique shape of hexagon tiles, you'll notice a certain degree of inconsistency from one section of the pattern to another. Therefore, both a vertical and horizontal borders, right and left corners must be designed. The "floor plan" illustrates which direction the points face, which is especially helpful for corner configurations.
- Each pattern can use only one collection. For example, you can't combine Color Story Glazed Mosaics and Color Story Unglazed Mosaics in the same pattern.
